Real vs generated: anisotropy vs lattice score, same clips
raw files: real mpeg4/10fps vs generated h264/24fps
(n=2000: 1000 generated / 1000 real)
n10: everything re-encoded h264 1280x704 10fps
(n=2000: 1000 generated / 1000 real)
True positive rate (generated found)
False positive rate (real called Generated)
False positive rate (real called Generated)
